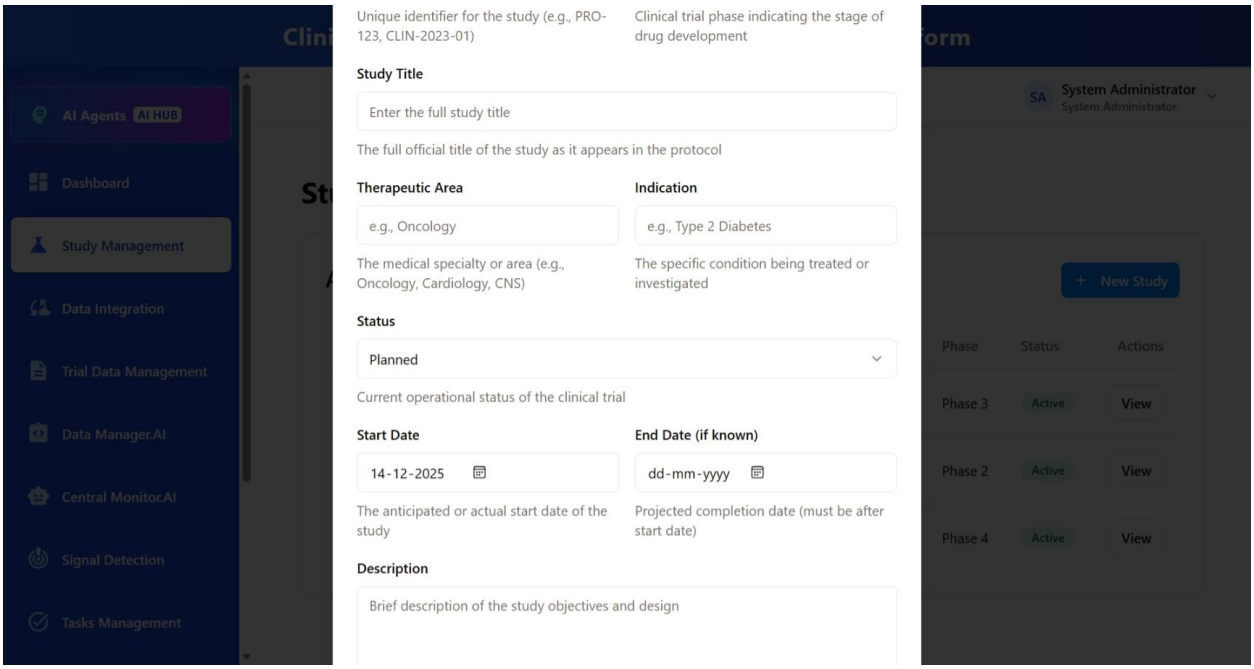
PRO003 Cardiovascular Outcomes Study Cardiovascular Heart Failure Phase 4 Active View



Unique identifier for the study (e.g., PRO-123, CLIN-2023-01)
Clinical trial phase indicating the stage of drug development
Study Title
Enter the full study title
The full official title of the study as it appears in the protocol
Therapeutic Area
e.g., Oncology
The medical specialty or area (e.g., Oncology, Cardiology, CNS)
Indication
e.g., Type 2 Diabetes
The specific condition being treated or investigated
Status
Planned
Current operational status of the clinical trial
Start Date
14-12-2025
The anticipated or actual start date of the study
End Date (if known)
dd-mm-yyyy
Projected completion date (must be after start date)
Description
Brief description of the study objectives and design

DQ and Reconciliation Complete
Here's a summary of the analysis on PRO001
2
DQ Issues
3
Reconciliation Issues
3
Tasks Created
4
Domains Affected
Key Findings
2 data quality issues detected in 2 domains
3 cross-source reconciliation discrepancies identified
Created 3 tasks for data managers and site monitors
Processed 848 records across 4 domains
Action Recommended
Review and address the identified issues. Several require immediate action based on their priority level.

Task Closed Action Required Nov 26, 2025, 11:04 PM
Task 1842 (Fix DM invalid value) has been automatically closed because the issue is resolved. Domain: DM, Record: DM-2-1, Source: EDC
Study: PRO002 Source: Data Manager.AI
TASK_715715: Closed Action Required Nov 26, 2025, 11:04 PM
This task has been closed. Domain: DM, Record: DM-2-1, Source: EDC
Study: PRO002 Source: Data Manager.AI
TASK_715715: Mark as Responded Action Required Nov 26, 2025, 11:00 PM
The issue in this task appears to be resolved. Please mark it as 'Responded' if you agree. Domain: DM, Record: DM-2-1, Source: EDC

Demographics, Adverse Events, Lab, Vitals

CM, EX, SV, TU
Medications, Exposure, Visits, Tumors

SAE, PD, DS, MH, IE
Serious AE, Deviations, Disposition, History

Key Relationships

- 1:N Trial → Domain Data
- M:N Users ↔ Trials
- 1:N Signal → Tasks
- 1:N User → Notifications

Data Sources

- **EDC:** Clinical data capture
- **Central Lab:** Laboratory results
- **Local Lab:** Site-specific tests
- **Imaging:** RECIST tumor data

Data Flow

1. Data ingestion from external sources
2. Validation and quality checks
3. AI processing and signal detection
4. Task creation and assignment
